

# Protect yourself against biological hazards!

Watch our video clips  
on prevention for public  
safety professionals

**Are you a public safety professional (e.g. police officer, firefighter, correctional services officer, wildlife officer or other peace officer)? While doing your job, you may come into contact with blood or body fluids visibly stained with blood.**

Short video clips explain the risks of infection and give concrete examples of situations that could arise in your daily life.

### **The video clips will help you:**

- define various contexts in which infections agents can spread;
- apply preventive measures at any time;
- know how to apply first aid;
- be aware of what to do in case of significant exposure.
